

- * HAVE HW OUT

- * BONUS PROBLEMS ARE ON THE BOARD

- * WARM UP: On worksheet from yesterday, complete the second and last problems (about women/credit cards & about the prob. rules)

Ch. 14 & 15 practice worksheet answers (book problems)

p. 338

13) there is overlap between the two events (owning car and owning an SUV).

16) The two events are not independent. Siblings being left-handed are dependent events

25) (a) $P(I) = 0.3403$

(b) $P(E \cup \text{No}) = 0.0796$

27) (a) $P(P \cap P \cap P) = 0.1952$

(b) $P(E^c \cap E^c \cap E^c) = 0.9131$

(c) Responses are independent

(d) As long as it is random polling, we can assume indep.

32) (a) 1- $P(AB) = 0.04$

2- $P(A \cup B) = 0.51$

3- $P(O^c) = 0.55$

(b) 1- $P(O \cap O \cap O \cap O) = 0.041$

2- $P(AB^c \cap AB^c \cap AB^c \cap AB^c) = 0.8493$

3- $1-P(A \cap A \cap A \cap A) = 0.9744$

4- $1-P(B^c \cap B^c \cap B^c \cap B^c) = 0.3726$

38) (a) $P(S \cap S \cap S^c \cap S^c \cap S^c) = 0.01382$

(b) $P(S^c \cap S^c \cap S^c \cap S) = 0.0921$

(c) $P(S \cap S \cap S \cap S \cap S) = 0.0000759$

(d) $1-P(S^c \cap S^c \cap S^c \cap S^c \cap S^c) = 0.5563$

41) $1-P(D^c \cap D^c \cap D^c \cap D^c) = 0.0776$

p. 362

8) (a) $P(M|C) = 6/18 = 0.3333$

(b) $P(C|F) = 12/28 = 0.4286$

(c) $P(F|D) = 16/24 = 0.6667$

11) (a) $P(PG \cap USA) = 84/7690 = 0.0109$

(b) $P(USA|PG) = 84/379 = 0.2216$

(c) $P(PG|USA) = 84/1557 = 0.0539$

(d) $P(\text{Primary}|China) = 506/1502 = 0.3369$

(e) $P(China|\text{Primary}) = 506/1161 = 0.4358$

13) $P(F) = 0.70$

$P(S|F) = 0.30$

$P(F \cap S) = P(S|F) * P(F) = 0.70 * 0.30 = \mathbf{0.21}$

19) $P(S) = 0.52$ $P(C) = 0.23$ $P(S \cap C) = 0.07$

(a) Eligibility = $P(S \cup C) = P(S) + P(C) - P(S \cap C) = 0.68$

Ineligibility = $P(S^c \cap C^c) = 1 - 0.68 = 0.32$

(b) $P(C|S) = \frac{P(C \cap S)}{P(S)} = \frac{0.07}{0.52} = 0.135$

(c) No. $P(C \cap S) \neq 0$

(d) No. $P(C|S) \neq P(C)$ or $P(C \cap S) \neq P(C) * P(S)$

22) $P(C) = 0.18$ $P(M) = 0.09$ $P(M \cap C) = 0.04$

(a) $P(C|M) = \frac{P(C \cap M)}{P(M)} = \frac{0.04}{0.09} = 0.4444$

(b) No. $P(C \cap M) \neq 0$

(c) No. $P(C \cap M) \neq P(C) \cdot P(M)$ or $P(C|M) \neq P(C)$

28) Independent: $P(B|A) = P(B)$ or $P(A \cap B) = P(A) * P(B)$

Check:

Does $P(R|F) = P(R)$?

$$\frac{0.26}{0.62} = 0.30$$

$$0.4194 \neq 0.30$$

or Does $P(R \cap F) = P(R) * P(F)$

$$0.26 = 0.30 * 0.62$$

$$0.26 \neq 0.186$$

So, no, they are not independent.

Problem #2

- 1) $P(W) = 83/130$
- 2) $P(W^c) = 47/130$
- 3) $P(C) = 42/130$
- 4) $P(C^c) = 88/130$
- 5) $P(W \cap C) = 22/130$
- 6) $P(W \cup C) = 103/130$
- 7) $P(W^c \cap C^c) = 27/130$
- 8) $P(W^c \cup C^c) = 108/130$

$$P(W \cap C)^c$$

Problem #4:

1) (a) $P(W \cup R) = 0.70 = P(W) + P(R) - P(W \cap R)$

(b) $P(R | W) = 0.298$

(c) No. $P(W \cap R) \neq 0$.

(d) No. $P(R | W) \neq P(R)$

Probably $P(R | W) \approx P(R)$

2) $P(M \cup J) = 0.73$

3) $P(O \cap H) = 0.1403$

4) (a) $P(F \text{ and } Z) = P(F \cap Z) = 0.0902$

(b) $P(F \text{ or } Z) = P(F \cup Z) = 0.5098$

$P(F) + P(Z) - P(F \cap Z)$
